**Youth Culture - What is it? S.P.Y. A.D.A.P.
(St. Peters Youth Adult Double Agent Program)**

This program is a ministry for adults from the world of Youth Ministry. The goal is to provide parents and adults of teens the tools that can improve communication and deepen relationships. This involves historical, sociological, psychological, and theological insights into the youth culture in America today. This program is presented in an open forum that will allow each session to adapt to the specific situations and experiences that apply to those in attendance.

This is not a parenting class! As a married man and fairly new parent, I would never dream of telling others how to parent. However, I can provide an insight into and a bridge between adult culture and youth culture. Using the best research available, we can form an alliance of support, encouragement and faith among parents in our parish.
