

Please do NOT allow your Student Lunch Account to become overdrawn.

The USDA has required all schools participating in federal meal programs to have a written and clearly communicated policy that addresses unpaid meal charges. An unpaid (charged) meal occurs when there are no funds available in the Student Lunch Account.

School Meals Charge Policy 2019 - 2020

Federal guidelines do NOT allow the School Lunch Program to operate on credit. **If your account is overdrawn your payment is due immediately.**

St. Peters School has not experienced many unresolved issues regarding unpaid (charged) meals. However, the problem does occur and federal regulations require stringent guidelines.

All families participating in the School Lunch Program are required to keep their account funded. Emails are sent when the account balance is low and will continue until a deposit is made. **Report cards will be held for all students with a negative balance. An account that is consistently overdrawn will necessitate a meeting with the Lunch Program Administrator and/or School Principal to discuss the situation.**

To manage your account more efficiently go to www.myschoolbucks.com and sign-up today. The system is easy. Just follow the instructions. If you need assistance please call the parent support line at 1-855-832-5226.

Families are encouraged to check their account balance on a regular basis and pay attention to email notifications. By working together the St. Peters School Lunch Program will continue to provide nutritious, delicious, well-balanced meals at a reasonable cost.

Free/Reduced Price Meal Applications are available on the school website
